REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:
3. There is no teaching in the cited art of record for an ad in an email to be delivered in a visible state and whereby a single activating member IN the email can be used to toggle the email between its initially visible state and its hidden state and vice versa. Figure 3 illustrates this feature as it shows the email main screen including the email body (46), initially visible advertisement in an advertising region (50) within the email, and an activating member (a button 48) in the email. When this activating member (48) is activated by the recipient, the advertisement disappears as can be seen in resulting figure 4. The activating member can then be used again as desired by the recipient to reveal the advertisement again. This collection of features is essentially present in each of independent claims 1, 3, 4 and 12.
4. The closest pieces of prior art include Viral Marketing which teaches the concept of a user including an advertisement (as an endorsement) in an email to a friend, Goldhaber et al which teaches user-compensation in association with advertising in emails, and Moncur (Javascript) which teaches the programmatic ability for a webpage to include buttons for showing and hiding graphical and other HTML-based elements. However, none suggest to one of ordinary skill the scope of the present claims.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
